Q1. First name	carol
Q2. Last name	sparks
Q3. Phone	██████████
Q4. Mobile	██████████
Q5. Email	████████████████████
Q6. Postcode	████
Q7. Country	Australia
Q8. Stakeholder type	Individual
Q9. Stakeholder type - Other	not answered
Q10. Stakeholder type - Staff	not answered
Q11. Organisation name	not answered
Q12. What is your preferred method of contact?	Mobile
Q13. Would you like to receive further information and updates on IFOA and forestry matters?	Yes
Q14. Can the EPA make your submission public?	Yes
Q15. Have you previously engaged with the EPA on forestry issues?	No

Q16. What parts of the draft Coastal IFOA are most important to you? Why?

I want to see the protection of Habitat given more focus. This is important in the survival of many of our native animals, the Koala being the most endangered.

Q17. What parts of the draft Coastal IFOA do you think have a positive outcome on the management of environmental values or the production of sustainable timber? Why?

I see any protection of our native vegetation as the most important part of forestry, it is a very poor practise to broad scale log such sensitive areas . To dig up native animal habitats to reach potential trees that quite often are left because they are not deemed saleable, this shows very low focus on sustainable logging.

Q18. What parts of the draft Coastal IFOA do you think have a negative outcome on the management of environmental values or the production of sustainable timber? Why?

Attaining a log count reducing the habitats and not being accountable to the environment.

Q19. What are your views on the effectiveness of the combination of permanent environmental protections at the regional, landscape and operational scales (multi-scale protection)?

How can you do both without correct supervision on the ground? There is simply not enough trained and ecologically sound education in this industry.

Q20. In your opinion, would the draft Coastal IFOA be effective in managing environmental values and a sustainable timber industry? Why?

No Not enough trained supervision in the forests.

Q21. General comments

Our government is going to wipe out our wildlife and our environment if we continue down this track. Serious decisions have to be made and this is not a serious document. Science Education and a change of culture must happen soon ,or it will be too late .

Q22. Attach your supporting documents (Document 1) not answered

Q23. Attach your supporting documents (Document 2) not answered

Q24. Attach your supporting documents (Document 3) not answered
