

8-7-18

To Whom it may Concern,

I am writing to you at the lack of care and management of the South East region of N.S.W. It appears to me that the government only put token measures in place at any consultation about what is really happening to our forests. I feel that it is about time the people elected to Government started Really Listening to what communities want and its not "cutting down our Forests". There is so much more at stake here, you need to be thinking about our children's children, not the ~~the~~ and short sightedness of the multi nationals that are the only winners here.

Kind Regards

Deborah Graham
