- Q12. **What is your preferred method of contact?** Email
- Q13. **Would you like to receive further information and updates on IFOA and forestry matters?** No
- Q14. **Can the EPA make your submission public?** Yes
- Q15. **Have you previously engaged with the EPA on forestry issues?** No
- Q16. **What parts of the draft Coastal IFOA are most important to you? Why?**
Conservation of old growth forest. Minimal impact on environment; wildlife, rivers & the forest as a whole.
- Q17. **What parts of the draft Coastal IFOA do you think have a positive outcome on the management of environmental values or the production of sustainable timber? Why?**
None. Quick clearfell of huge areas of forest with disregard of the long term disasterous effects.

Q18. What parts of the draft Coastal IFOA do you think have a negative outcome on the management of environmental values or the production of sustainable timber? Why?

Logging large timber means loss of animal habitat. Clearfelling means erosion & river silting which is devastating for aquatic life & soil.

Q19. What are your views on the effectiveness of the combination of permanent environmental protections at the regional, landscape and operational scales (multi-scale protection)?

Safeguards are being ignored for short term cash grab. Shame.

Q20. In your opinion, would the draft Coastal IFOA be effective in managing environmental values and a sustainable timber industry? Why?

No. The draft Coastal IFOA is only about quick production of saw logs with little regard for the future. Please have the guts to preserve what little we have left.

Q21. General comments

Please have the guts to preserve what little we have left.
