

**Respondent No:** 477  
**Login:** Srobertson  
**Email:** sue.g.robertson@gmail.com

**Responded At:** Jul 10, 2018 19:24:34 pm  
**Last Seen:** Jul 10, 2018 09:06:11 am  
**IP Address:** 127.0.0.1

- Q1. **First name** [REDACTED]
- Q2. **Last name** [REDACTED]
- Q3. **Phone** [REDACTED]
- Q4. **Mobile** not answered
- Q5. **Email** [REDACTED]
- Q6. **Postcode** [REDACTED]
- Q7. **Country** Australia
- Q8. **Stakeholder type** Individual
- Q9. **Stakeholder type - Other**  
not answered
- Q10. **Stakeholder type - Staff**  
not answered
- Q11. **Organisation name** not answered
- Q12. **What is your preferred method of contact?** Email
- Q13. **Would you like to receive further information and updates on IFOA and forestry matters?** Yes
- Q14. **Can the EPA make your submission public?** Yes, but anonymous
- Q15. **Have you previously engaged with the EPA on forestry issues?** No
- Q16. **What parts of the draft Coastal IFOA are most important to you? Why?**  
Negative Impact of Intensive harvesting and importance of protecting old growth forests
- Q17. **What parts of the draft Coastal IFOA do you think have a positive outcome on the management of environmental values or the production of sustainable timber? Why?**  
Protection of habit is important so that other species reliant on liveable habit are not negatively impacted by disruption and habit loss.

**Q18. What parts of the draft Coastal IFOA do you think have a negative outcome on the management of environmental values or the production of sustainable timber? Why?**

Rule driven intensive harvesting will not notice or respond to negative impact until it is too late. Intensive harvesting causes multiple negative consequences and should stop. Some of these are erosion and silting up of river systems which degraded the pristine quality of the forest areas. It is the beauty of these areas which feeds tourism and enhances quality of life. Forestry has clear felled areas go forest on the north coast of Nsw with absolutely no regard for wildlife or environmental degradation. In a time where species extinctions and climate change are seriously impacting everything, there should be no negative environmental impact as a specific goal.

---

**Q19. What are your views on the effectiveness of the combination of permanent environmental protections at the regional, landscape and operational scales (multi-scale protection)?**

They should be stricter with greater emphasis on expanding protections and wilderness areas. Ie Heritage listings.

---

**Q20. In your opinion, would the draft Coastal IFOA be effective in managing environmental values and a sustainable timber industry? Why?**

No. I've seen clear felled areas. Forest don't just recover. Nor does the wildlife dependant on the forests and rivers.

---

**Q21. General comments**

Introduce stricter protections of forested areas including national parks- no national park logging. Control population growth in Australia and maintain quality of life for not just humans but other species with whom we share the environment.
